

# ECOSENSE

## Bio-Decontamination Services

### Scope of Services

The Ecosense Company provides on-site decontamination of rooms, buildings, equipment, confined spaces and all modes of transportation. Our services protect clients from harmful bacteria, viruses, mold, odors and the spread of infectious disease as part of a scheduled preventative service program or on an emergency basis.

We also provide off-site contract sterilization services at our facility. We sterilize individual products, supplies and equipment in our sterilization chamber, or can easily accommodate large equipment by constructing a custom size fumigation tent.

The Ecosense Company serves a diverse client base including pharmaceutical, food processing, research, cleanroom, veterinary, healthcare, education, athletic, 1<sup>st</sup> Responders, corrections, commercial, residential, municipalities and governmental entities. We deploy the industries widest range of no-touch sterilization and disinfection technologies, providing us with the unique ability to offer custom treatment programs that save customers time and money
