

Ecosense Disinfection and Sanitization Services

Save money and protect your employees, customers and business from harmful bacteria, viruses, infections and odors.

Our two-step approach combines advanced disinfection services with extended anti-microbial protection. We destroy up to 99.9% of harmful microorganisms and save clients money by eliminating costly and time consuming steps

Think you're protected? Think again! Studies validate that...

- Over 50% of surfaces remain contaminated after traditional cleaning
- 30% of bacterial burden typically returns within 6.5 hours of cleaning
- 72% of Staph infections are acquired outside of a hospital setting

Our Treatments Are Effective Against:

- Airborne Contamination
- MRSA Staph Infections
- Pathogenic Microorganisms
- Hospital Acquired Infections
- Surface Contamination
- C-diff Dissemination
- Norovirus Outbreaks
- Nuisance Odors

Hiding in Inaccessible Places

TAKE OUR FREE SWAB TEST

1. Identify key areas at greatest risk of contamination
2. Discover if current sanitizing methods are effective

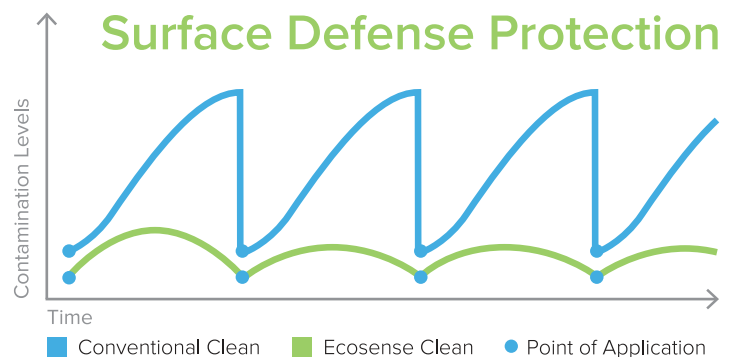

What's the big deal about Surface Defense?

Similar to how Scotchguard® revolutionized protecting soft goods from stains, our surface protection provides you with an EPA approved method for controlling contamination and odors

With Surface Defense, you remain protected between cleanings for up to a year from a wide range of harmful contamination, odors and more. Your area now has a protective shield minimizing the ability for harmful microbial growth and multiplication.

Ecosense Offers a Practical Solution

- Affordable plans that insure you won't be under protected in high-risk areas or pay for protection you don't need
- Safe and eco-friendly treatments with low-toxicity products. Save money by extending the useful life of your furnishings!
- Certified environmental disinfection specialists provide you with documented results and peace of mind
